

CANTILEVER MOUNT SPINDLE MODELS

DTS 4300

The DTS 4300 features the same mounting pattern as the DTS 3300. It also has the same shaft, bearings, and seals. The DTS 4300, however, features a larger diameter motor that delivers almost twice the horsepower generated by the DTS 3300. Because of a more powerful motor, the DTS 4300 will accommodate larger diameter diamond rolls and is a candidate for more demanding plunge applications.
