

OUTBOARD SUPPORT SPINDLE MODELS

# DTS 3402 / DTS 3404

The DTS 3400 outboard support spindle series uses the same motor as the DTS 3300 cantilever mount spindle. These spindle models are useful when roll packs are required and in moderately demanding plunge applications. Each model requires a cradle to secure the spindle to the grinding machine. Please consult G II Solutions, Inc. for cradle information. The diamond rolls that each model may accommodate are listed in the table below.

Spindle Model	Overall Length	Diamond Roll Width Range
DTS 3402	9.868	1.880 - 2.050
DTS 3404	11.868	3.880 - 4.050

Technical drawings include side views with dimensions: 5.677 (partial length), Overall Length, and Diamond Roll Width Range. A table lists spindle models, overall lengths, and diamond roll width ranges. End views show dimensions: 2.125, 1.688, and 1.688. A perspective view shows the motor and spindle assembly with dimensions: 2.7500, 2.04720, 2.0471 (52mm), and 1.8500.
